

Neysha Pagán Vargas

Enterprise Data Architect | Cloud Data Platform Leader | Data & AI Strategy

Tampa, FL | npagan247@gmail.com | (787) 242-2474 | LinkedIn: [linkedin.com/in/neysha-pagan-a7346a102](https://www.linkedin.com/in/neysha-pagan-a7346a102) | GitHub Portfolio: github.com/neypagan

PROFESSIONAL SUMMARY

Strategic Data & Analytics Leader with 14+ years of experience across database administration, data engineering, cloud data architecture, BI, analytics governance, and enterprise data platforms. Proven record designing Azure/Fabric Lakehouse ecosystems, modernizing legacy reporting environments, optimizing SQL/cloud workloads, and leading cross-functional delivery across engineering, analytics, data science, and executive stakeholders. Experienced translating business objectives into governed, scalable data products that improve reliability, cost, performance, access control, and AI readiness.

Career Span: 2012-Present | 14+ years across database administration, data engineering, cloud architecture, BI/analytics, governance, and enterprise data platforms.

Target Roles: Enterprise Data Architect | Cloud Data Architect | Data Platform Manager | Director of Data & Analytics | Data Engineering Manager | Data Governance & AI Strategy Leader

CAREER HIGHLIGHTS

- Scaled an enterprise Azure/Fabric data platform from 4 to 7 brands/entities while strengthening governance, security, semantic modeling, and cross-brand reporting readiness.
- Reduced daily cloud platform spend by approximately 47.8% through Databricks/Fabric optimization, workload scheduling, capacity analysis, and compute governance.
- Improved processing performance by up to 87% for one business unit and approximately 85% for another, increasing platform reliability and downstream reporting stability.
- Architected Azure Databricks/Delta Lake Medallion architecture integrating 15+ data sources, reducing reporting latency from 24 hours to under 2 hours and enabling SCD Type 2 tracking.
- Supported and monitored 700+ SQL Server and Oracle databases across enterprise environments, including aerospace, healthcare, audit, consulting, and public-sector platforms.

CORE COMPETENCIES & TECHNICAL STACK

- **Enterprise Data Architecture:** Microsoft Fabric, OneLake, Azure Databricks, Delta Lake, Azure Data Factory, ADLS Gen2, Lakehouse, Medallion Architecture, dimensional modeling, semantic model governance, KPI standardization.
- **Databases & Platforms:** SQL Server 2005-2022, Azure SQL Database, Oracle 10g/11g/12c, MySQL, PostgreSQL, MariaDB, Snowflake, AWS, SQL Server Always On Availability Groups, HA/DR, RPO/RTO planning.
- **Engineering, BI & Automation:** PySpark, Spark SQL, T-SQL, PL/SQL, Python, PowerShell, SSIS, Git/GitHub, Azure DevOps, CI/CD, Power BI, DAX, SSRS, Tableau, Excel Power Pivot, report automation.
- **Governance, Security & Domains:** Entra ID, RBAC, managed identities, service principals, Microsoft Purview, data quality, lineage, auditability, access governance, cost/capacity optimization; hospitality, insurance, healthcare, audit, aerospace, government, education technology, consulting.

PROFESSIONAL EXPERIENCE

StayTerra Vacations - Bradenton, FL | Manager, Analytics & Reporting | Sep 2025-Present

- Defined and operationalized enterprise data strategy and governance roadmap, transitioning from siloed MySQL-based reporting to a governed multi-entity Azure/Fabric Lakehouse platform.
- Architected and scaled centralized data platform from 4 initial brands/entities to 7, maintaining unified governance, identity, access, and workspace strategy across Fabric, Databricks, and Power BI.
- Designed metadata-driven Landing, Bronze, Silver, and Gold layers with data quality controls, lineage, traceability, watermark logic, schema validation, and run-level auditability.
- Directed Fabric/Databricks capacity planning, workload isolation, semantic model refresh alignment, SKU analysis, and cost/performance optimization, reducing daily cloud spend by approximately 47.8%.
- Partnered with analysts, data scientists, executives, and business stakeholders to enable governed semantic models, certified reporting, self-service BI, and AI-ready data products aligned to enterprise KPIs.

Universal North America - Sarasota, FL | Database Architect / Consultant | Nov 2024-Present

- Led enterprise data governance and database modernization initiatives, integrating compliance, operational visibility, security, and executive reporting into a unified data strategy.

- Architected high-availability SQL Server clusters across multiple datacenters using Always On Availability Groups and documented RPO/RTO, replication, and operational governance scenarios.
- Developed PowerShell and T-SQL automation for health checks, index monitoring, OS/version audits, file utilization analysis, and centralized DBA_Audit reporting.
- Optimized SQL Server configurations including MAXDOP, tempdb, memory, file growth, and index maintenance, achieving approximately 25% database performance improvement.

Deloitte - FL / Remote | Manager, Solutions Architecture / Lead DevOps Engineer | Oct 2022-May 2025

- Architected and implemented Azure Databricks/Delta Lake Medallion architecture, unifying 15+ disparate data sources, reducing reporting latency from 24 hours to under 2 hours, and enabling SCD Type 2 history.
- Led ingestion and optimization across Azure Data Factory, PySpark, SQL Server, and Delta Lake, embedding automated data quality controls, schema standardization, and governance-aligned documentation.
- Improved query performance by 40% and eliminated redundant data at scale through reusable engineering patterns, performance tuning, metadata-driven design, and optimized transformation logic.

Neudesic - NY / Remote | Senior Consultant I - Data & AI | Mar 2022-Oct 2022

- Delivered enterprise Power BI solutions, tabular models, DAX measures, scenario-based KPIs, Azure Synapse pipeline support, dimensional modeling, Microsoft Purview evaluation, and intern mentoring.

GEEO - Global Education Exchange Opportunities | Database Architect, Consultant | Oct 2022-Jul 2023

- Administered AWS MariaDB/SQL Server/Azure SQL environments, supported migrations, reporting data warehouse design, RBAC, data governance, Power BI reporting, and data quality.
- Dude Solutions | Database Engineer | Aug 2021-Mar 2022
- Managed transactional and analytical database infrastructure, performance, availability, scalability, reporting, and AWS/Snowflake migration support.

Deloitte Services LP | Lead DevOps Engineer / System Administrator, Audit Data Platforms | Jan 2019-Aug 2021

- Supported Azure SQL Databases and SQL Server VMs across environments; automated security, performance monitoring, user access controls, index maintenance, CI/CD-oriented operations, and Power BI/Excel reporting.

DXC Technology | Professional Database Engineer | Jul 2017-Jan 2019

- Supported 700+ SQL Server and Oracle databases across commercial, aerospace, and defense clients; handled HA, clusters, backups, patching, migrations, performance tuning, and health reporting.

Molina Healthcare | MSSQL Analyst, Reporting & Analytics | 2016-Jul 2017

- Built healthcare and finance analytics datasets, SQL reporting processes, Power BI reports, QNXT/MedInsight validation, and compliance reporting for government and operational stakeholders.

Eastern Consulting Group | Database Administrator & Developer | 2015-2016

- Managed SQL Server, MySQL, Access-to-SQL migrations, FTP-based data ingestion, reporting automation, DR planning, healthcare analytics, and data warehouse assessments.

Puerto Rico Highway & Transportation Authority | Database Administrator, Oracle & AIX | 2012-2015

- Administered Oracle 10g and AIX environments, including RMAN backups, tablespaces, datafiles, user security, storage/filesystems, SQL tuning, backup/recovery, and operational monitoring.

EDUCATION, CERTIFICATIONS & LANGUAGES

- **Education:** CDAIO (Chief Data & AI Officer) Program, Carnegie Mellon University, expected Jul 2026 | M.S. Applied Data Science, Syracuse University | B.S. Computer Information Systems, University of Puerto Rico at Mayagüez
- **Certifications:** Microsoft Certified: Azure Database Administrator Associate, Azure Fundamentals, Azure Data Fundamentals, Administering a SQL Database Infrastructure, MTA Database Fundamentals | Profisee Master Data Architect & Master Data System Administrator | SAFe 5.0 Agilist | IBM Big Data Technologies | Microsoft AI & Data Science
- **Languages:** English (Fluent) | Spanish (Fluent)
